

FASTEST FINGER FIRST INDICATOR MODEL-

Are you planning for adding more fun in your Quiz-type game shows?

BPS have the complete solution. **BPS** Make Fastest Finger First Indicators (FFFIs) are used to test the contestant's reaction time. In such type of games it is difficult for the show administration to find the contestant who pressed the switch first. The player's designated number is displayed with an audio alarm when the player presses his entry number.

FUNCTION:-

BPS Make fastest finger first indicator determines as to which of the contestants first pressed the button and locks out the remaining entries of other members.

FFFI is designed around a microcontroller which forms the control unit of the device. The microcontroller scans and finds the first person who pressed the switch and indicates the same.

Simultaneously, an audio alarm(buzzer) and the correct decimal number display of the corresponding contestant are activated.
